Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Applicant's Amendment filed 12/21/07 has been entered and carefully considered. Claims 1-8 have been canceled. New claims 9-20 have been added. Limitations of newly added claims have not been found to be patentable over prior art of record, therefore, claims 9-20 are rejected under the new ground rejections as set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 9-12, 14-18, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Cupp (U.S. Pat. # 6,766,805).

With regard to claims 9-12, 14-18, 20, Cupp discloses an auxiliary fitting (figs. 1-4) comprising a support being a hair band (11) and a plurality of artificial locks (14) being connectable to the support, wherein at least two locks being different in shape (col. 4, lines 15-17 and fig. 4); at least one of the locks being removably fastened to the support by a non permanent fixing means (17), one of the two locks being fixed to a male band of hook and loop fasteners and the support being integrally provided with at least one female band of the hook and loop fasteners (see fig. 3 and col. 2, lines 61-65); at least two different locks (14, 16) being fastened to the support such as to be simultaneously and also being arranged on opposite sides relative to the midline of the support (see fig. 1).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rice (U.S. Pat. # 5,493,735).

With regard to claims 9-20, Rice discloses an auxiliary fitting that can be removably worn by a person (figs. 1-3) comprising a support defining a wig cap (13) and a plurality of artificial or natural (col. 4, lines 14-17) locks (35, 37, 39, 41) being connectable to the support, wherein at least two locks being different in size (fig. 3 shows the hair being in different length); at least one of the locks being removably fastened to the support by a non permanent fixing means (47), one of the two locks being fixed to a male band of hook and loop fasteners and the support being integrally provided with at least one female band (49) of the hook and loop fasteners (col. 3, lines

45-54); at least two different locks (35, 37, 39, 41) being fastened to the support such as to be simultaneously and also being arranged on opposite sides relative to the midline of the support (see fig. 1).

Response to Arguments

In response to applicant's argument that Cupp and Rice fail to serve for radially modifying his or her hairstyle or allow any comparison between the user's own hairstyle and any different hairstyle based on one of the locks, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
